

windsor telecom®
numbers you can count on™

brookland COMPUTER SERVICES

Brookland Computer Services, an IT solutions provider, required non-geographic numbers to replace their main telephone and fax numbers and to be used for different areas of their business. They were also looking for a service that would be of use if their landline numbers went down.

Solution:

- Four highly memorable 0845 numbers
- Targetmaster Plus

Targetmaster Plus service is the perfect disaster recovery solution if a landline number goes down for any reason. It enables an 0845 number to be re-routed instantly to an alternative landline or mobile number ensuring that inbound calls are always answered.

"...We have used Windsor Telecom for over 3 years and have never received anything less than first class service. With Windsor Telecom's help we have been able to provide reliable and high quality services to our customer base...."

Eammon Fogarty , Director of Brookland Computer Services Ltd
